

How can I manage my common infection?

A leaflet for adults aged 16 years and over

1. What are the symptoms of a common infection?

2. What if I think I have coronavirus (Covid-19)?

If you think you may have COVID-19 then please visit http://www.gov.uk/coronavirus or http://www.nhs.uk for the latest guidance and information.

TARGET is operated by the UK Health Security Agency. Developed in collaboration with professional medical bodies. Version 1.1: Nov 2020 Revision: Nov 2023

3. How can I treat a common infection?

Get plenty of rest until you feel better.

Take pain relief if you need to (make sure you follow the instructions).

Drink plenty of fluids (6 to 8 drinks, or 2 litres) so that you pass pale-coloured urine regularly.

For **coughs**, try honey and cough medicines. For **sore throats**, try medicated lozenges and pain relief.

Soothe **eye infections** with a clean warm or cold damp flannel.

For an **outer ear infection,** apply local heat (such as a warm flannel).

Visit www.nhs.uk for self-care advice on common infections

5. Will my infection need antibiotics to get better?

- Your body can normally fight off common infections on its own.
- You do not usually need antibiotics, unless symptoms of a bacterial infection (such as a urine infection) are severe – a healthcare professional can advise you on this.
- Taking antibiotics when you do not need to puts you and your family at risk.
- Follow your healthcare professional's advice on antibiotics.

Find out more about antibiotics at www.antibioticguardian.com

6. How can I stop my infection from spreading?

If you need to cough or sneeze:

with a tissue (or vour inner elbow)

throw away used tissues

Kill it

by cleaning your hands

Clean hands for at least 20 seconds with soap and water or hand sanitiser:

after using the toilet

when leaving and arriving home

Avoid touching your eyes, nose or mouth with unclean hands.

If possible, keep your distance from others (2 meters or 6 feet), especially vulnerable people in your household.

Do not share items that come into contact with your mouth, such as eating utensils and toothbrushes.

Keep yourself and your family up to date with vaccinations. Always get winter vaccines (such as flu) if you are eligible.

Visit or call a pharmacy for further advice on common infections

7. What symptoms of serious illness should I look out for?

Severe headache and vomiting

Ongoing fever or chills (temperature above 38°C or less than 36°C)

Problems swallowing Turning blue around the mouth

Coughing **blood**

Breathing faster or slower than usual

Kidney pain in your back just under your ribs

Chest pain or tightness New very fast or slow pulse

Visible **blood** in urine

Severe pain on passing urine, or passing more urine at night

Cloudy urine not improving in 1 to 2 days with fluids

If you have the symptoms above, contact your GP urgently or use the following services for your region.

www.111.nhs.uk

NHS Direct Wales

NHS Scotland

www.nhs24.scot

Northern Ireland

Contact your **GP** practice

These services can provide a confidential interpreter if you need one.

8. What if I suspect signs of sepsis?

Sepsis is a life-threatening reaction to an infection. Possible signs are:

- slurred speech, confusion or drowsiness
- extreme shivering
- passing no urine in a day
- severe breathlessness
- it feels like you're going to die, and
- skin blotchy or discoloured.

Call 999 immediately if you or others have signs of sepsis
